

# Configuring your Internet Explorer Browser for using MyApps Remote Access

<p><b>1.</b> From Internet Explorer, at the top right corner of your screen, click on the <b>Gear</b> icon</p>	
<p><b>2.</b> From the drop-down list, select <b>Internet options</b></p>	
<p><b>3.</b> From the Internet Options pop-up box, click on the <b>Security</b> tab</p>	
<p><b>4.</b> Click on <b>Trusted Sites</b> and</p>	
<p><b>5.</b> then click on the gray <b>Sites</b> button</p>	
<p><b>6.</b> Ensure that the box next to the text <i>"Require server verification (https:) for all sites in this zone"</i> is unchecked</p>	
<p><b>7.</b> In the top entry field, type in *.upmc.edu - then, click <b>Add</b></p>	
<p><b>8.</b> The top field will appear again as blank. Type in *.upmc.com, a second time, and click <b>Add</b>.</p>	

**You will now be able to access MyApps remotely.**
